INTERNATIONAL CONFERENCE ON TECHNOLOGIES IN STEM

BY PROFESSOR P JOHN WILLIAMS

The conference aims to further the application of technology education within STEM and specific learning areas. Within Technology education, students use design and/or computational thinking and technologies to generate and produce designed solutions both digital and physical for authentic problems. As such it applies many of the areas of STEM.

We invite practitioners & researchers to network and share their experiences. Teachers, and heads of learning areas as well as teacher educators, researchers & HDR researchers from K to higher education are all encouraged to attend. A broad range of technology education topics, including significant developments as well as innovative uses of technology that promote learning, performance, and instruction, will be presented at ICTSTEM.

We invite education professionals, academics and researchers from all fields of applications and backgrounds to submit papers to ICTSTEM 2021.

What can you expect at ICTSTEM?

- Ample interaction opportunities for ICTSTEM delegates
- Top Singapore hospitality for all attending delegates
- An intellectually stimulating scientific program featuring more than 100 presentations by leading researchers, teachers, and practitioners
- Selected Authors will be approached to expand their paper to a chapter in a Springer Publication
